

POTOMAC

In an effort to raise the bar even higher and create more credibility and respect in our industry, Potomac Fund Management, Inc. has hired Alpha Performance Verification Services to help us in maintaining Global Investment Performance Standards (GIPS®) compliance. Alpha Performance Verification Services provides GIPS® verification and compliance consultation services to the investment management industry. Maintaining these new standards allows us to compete at the highest levels with the largest firms in the country.

What is GIPS®?

The GIPS® standards are ethical standards for investment performance presentation to ensure fair representation and full disclosure of an investment management firm's performance.

Verification is the independent review of an investment management firm's claim of compliance with the GIPS® standards.

Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis.

Verification is firm wide and cannot be carried out for a single composite. A composite specific performance examination can be conducted on a particular composite, but only in conjunction with a firm-wide verification.

For more information on the GIPS® Standards, please visit www.gipsstandards.org.

For more information on Alpha Performance Verification Services, please visit www.alphaverification.com.

Why does Potomac Fund Management report both composite and representative account results?

When Potomac Fund Management, Inc. was founded in 1987 the technology was not available to construct and comply with current GIPS® verification standards. A few years ago, we made the decision to bring our firm into GIPS® compliance. GIPS® require that firms must, at a minimum, have performance going back five years or since inception in order to be compliant. Potomac decided to take on the arduous task of bringing all of our records, starting in 2002, into compliance with GIPS® standards. However, in order to communicate to investors the true value added from our services we needed to also keep the long-standing track record of our representative accounts. Therefore, we made the decision to report both composite and representative account results.

POTOMAC

GIPS REPORT 2021

Potomac Fund Management, Inc. claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Potomac Fund Management, Inc. has been independently verified for the periods January 1, 2002 through March 31, 2021. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis.

The Guardian Composite has been examined for the period January 1, 2002 through March 31, 2021. The Navigrowth Composite has been examined for the period January 1, 2002 through March 31, 2021. The Income Plus Composite has been examined for the period March 1, 2010 through March 31, 2021. The Advisor Express Composite has been examined for the period July 1, 2003 through March 31, 2021. The Bull Bear Composite has been examined for the period July 1, 2002 through March 31, 2021. The High Yield Plus Composite has been examined for the period July 1, 2015 through March 31, 2021. The verification and performance examination reports are available upon request.

Potomac Fund Management, Inc. is an independent registered investment adviser. The firm maintains a complete list and description of composites, which is available upon request.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Beginning July 1, 2002, composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash inflow or outflow of at least 10% of portfolio assets. The temporary removal of such an account occurs at the beginning of the month in which the significant cash flow occurs, and the account re-enters the composite the month after the cash flow. Additional information regarding the treatment of significant cash flows is available upon request. Past performance is not indicative of future results.

The U.S. Dollar is the currency used to express performance. Returns are presented net of management fees and include the reinvestment of all income. Performance was calculated using actual management fees. The annual composite dispersion presented is an equal-weighted standard deviation calculated for the accounts in the composite the entire year, presented net of fees. Additional information regarding the policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

The current fee schedule is comprised of three parts: The Platform Fee (0-40bps), the Client Advisor/Solicitor Fee (0-150bps), and a Strategy Fee (0-90bps). Actual investment advisory fees incurred by clients may vary.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

*Partial year of performance.

Guardian Composite contains fully discretionary fee-paying accounts invested in the Guardian investment strategy. Guardian is a tactical 'growth and income' strategy with the goal of conservatively participating in both equity and income markets, while avoiding catastrophic bear market losses. The strategy will rotate among a suite of affiliated tactical mutual funds overweighting positions that focus on balanced and conservative equity growth. The underlying funds utilize a combination of dynamic asset allocation and mechanical system trading. Additionally, they employ risk management techniques including the use of inverse and cash positions during adverse market conditions; cash positions could at times be 100%. For comparison purposes the composite is measured against a benchmark comprised of 35% MSCI World Index TR, 25% Bloomberg Barclays Global Aggregate Index TR and 40% Bloomberg Barclays 1-3 Month T-Bill. The Guardian Composite was created May 1, 1996.

Advisor Express Composite contains fully discretionary fee-paying accounts invested in the Advisor Express investment strategy. Advisor Express is a tactical 'conservative growth and income' strategy where investments are limited to mutual funds available in the large and broad-based Fidelity Funds universe. The strategy is unconstrained in nature which allows it to invest in a variety of asset classes both domestic and international. For comparison purposes the composite is measured against a benchmark comprised of 40% MSCI World Index TR, 20% Bloomberg Barclays Global Aggregate Index TR and 40% Bloomberg Barclays 1-3 Month T-Bill. Effective 12/31/2017 any accounts traded directly at the fund company, using load shares, were removed as they are no longer representative of the overall composite. The Advisor Express Composite was created January 1, 2003.

High Yield Plus Composite contains fully discretionary fee-paying accounts invested in the High Yield Plus investment strategy. High Yield Plus is a tactical 'total return' strategy that will invest in mutual funds and ETFs. The strategy is a highly concentrated strategy that invests in one or more high yield bond funds when opportunities for growth appear to be strong. During a higher risk environment or the potential for a significant downturn, the strategy will move the portfolio to a money market or low volatility fund to minimize exposure to catastrophic losses. The decision to invest in the market is based on the evaluation of technical market indicators. For comparison purposes the composite is measured against the Bloomberg Barclays U.S. Corporate High Yield Bond Index. The High Yield Plus Composite was created July 1, 2015.

2016	184,186	408	<6	1.64%	11.96%	N/A		

Focused Growth Composite contains fully discretionary fee-paying accounts invested in the Focused Growth investment strategy. Focused growth is a tactical 'moderate growth' strategy that invests in mutual funds and ETFs. The strategy is highly concentrated and invests in a single S&P 500 Index fund when opportunities for growth appear to be strong. During a higher risk environment or the potential for a significant downturn, the strategy will move the portfolio to a money market or low volatility fund to minimize exposure to catastrophic losses. The decision to invest in the market is based on the evaluation of technical market indicators. For comparison purposes the composite is measured against the S&P 500 Total Return Index. The Focused Growth Composite was created January 1, 2016.
